MISSING BRICKS OVERVIEW

MINDSCAPE

Brick on top of roof and cliffs (14+ locations).....easy: brick overhangs
hard: center of roof (need cooperation)

Brick under bridges/ceiling of tunnels (4 locations).....easy: on rock shelf
hard: stuck on ceiling with pizza dough (need tool)

Brick hidden behind things..... easy: objects,signs that are crooked
hard: in doors, secret cabinets, caves that require combinations (need puzzel/clue solving)

Brick at Race finish lines or in trophy.....easy: in obvious spot (select)
Hard: Win at race track, jetski

Bricks that are found in activity
related functions..... in mailbox, on pizza, under cars, on gas pump, under chairs,
in and around guis (store, telescope, juke boxes)

easy: discover/visual clues and/or dialogue clues
hard: puzzel solving/deduction

LOCATION		Specifics	How It Is Discovered	How It Is Retrieved
BEACH **8 possible brick hiding places.**	3X	Brick is on top of the buoy at the finish line	**Visual** (prompted by trails of dialogue from people I.E. discussions of spotting the Brickster heading to the Pizzeria where Mama tells of a pizza heist. Nick suggests following the obvious trail of pizza slices left behind which leads to the beach. The judge announces the race is about to begin in X minutes.) The Brickster is already out in the water on a jetski. He races ahead and places a brick on the buoy that is slowly sinking from the weight. RACE! The brick will bob to the surface again if you miss your chance. Your score will reflect how many times.	**Build** jetski before the race starts. **Race** to the finish line...manuver to docking position...build a dock to steady jetski. (Bricker) **select** brick (cursor changes to found brick icon) When selected animation of retrieval occurs and"found a Brick" music begins. If you don't win the race, the Brickster appears and steals the brick again (animation)
	3X	Brick appears to be floating out in the bay... It is on the back of the shark... he snaps at it...the brick is in his jaws...	Visual prompted by a trail of dialogue from people.	Chase shark, retrieve brick by inventive solution: toss pizza to shark, bump shark,etc anyway to get him to spit out the brick... and select it before it sinks. now (with jaw free) race away to avoid shark. If you are caught by the shark, you manuver jetski to get out of his jaws(a cartoon maze through shark stomach). Ideal: gui to escape before jaw closes or animation...
	2A 2B 3C	Brick is in the secret cave (accessible by jetski.) Also accessible by bike or by walking...gui build not required to get there. Score reflective of transport method.	Visual prompted by a trail of dialogue from people. (Possible Pirate Treasure Map found in floating bottle) (book on book shelf in Info Center could contain map of LEGO Island in the 1800's) You learn of this from our town gossip in the store.	Dock jetski/build stairs/ bridge from water to cave... 1)Discover chest in cave. Pry open with tool. 2) Maze of tunnels in cave; follow markers (pictographs) to chest (same as above) 3) Same as above..Chest is perched high above a stalagmite. building stairs is required.
	2	Brick is attached underneath the jetski	Jetski is extremely slow and is slowly sinking. Motor sounds wrong.	Manuver to docking position. Tow jetski up to drydock. Deconstruct.
	1	Brick is on top of palm tree	Visual	Build stairs (bricker) or knock it down with bricker or enlist the help of others (or all three)
	1	Brick is on top of flag pole on the roof of bldg.	Visual	Build stairs or knock it down with bricker or enlist the help of others (or all three)
